

PRODUCT CARE

Naturepedic Organic Mattress Topper

SPOT CLEAN ONLY

Allowing water or other liquids to penetrate your mattress topper could damage the filling. Do not machine or hand wash this product, and limit exposure to moisture.

SPILLS + STAINS

We're human, and we know life happens. If you must clean your topper, we advise that you apply hydrogen peroxide to the affected area, gently scrub it with a damp cloth and allow it to fully dry. Please note that any exposure to liquid may damage your topper and void your warranty.

PROTECT + PREVENT

Your best defense against spills and stains is proper prevention. We recommend using an organic mattress protector on top of both your mattress and topper to keep things spotless.

Don't have a protector?

We've got you covered – your mattress, that is.
